toolholders

ETP HYDRO-GRIP

Hydraulic high precision toolholders

HYDRO-GRIP high precision tool holders are your guarantee of secure clamping for milling, drilling and reaming tools. Their unique strength provides precision and rigid-tool stability to improve machining performance for the largest number of applications. With the extensive range of HYDRO-GRIP® high precision toolholders all application areas, from finishing to heavy roughing, is covered. Bore diameters 6 – 32 mm available.

BENEFITS & FEATURES

- Easy handling and tool change
- Minimum tool run-out ensures good surface and extends tool life
- High speed capability
- Dampens noise and vibration
- Length pre-setting possible to save time

About ETP Transmission AB

ETP Transmission AB, after being in business for more than 50 years, has successfully developed products for 3 business or application areas.

- Metalworking • Woodworking
- Power Transmission under the registered trademarks ETP® and ETP HYDRO-GRIP®.

ETP Transmission AB

– leader in hydraulic clamping and centering products

Our business concept and all products are based upon the hydraulic principle. The ETP high precision products offer quick assembly and disassembly. With other words, you can fit your tools or components quick, easy and precise and run at high speeds. Within a few seconds you achieve perfect centering and fastening, simply by tightening of only one screw. Saving you time and money.

We are a global company and our customers are the leaders within their segments. This is the way we like it, working with companies that expect the absolute best from us. Your challenges drive us forward!

Industry segments

ETP HYDRO-GRIP has for many years enabled high quality machining within industry segment with high quality demands, such as: Aerospace, Automotive, Die & Mould, General Machining, Medical, Oil & Gas.

Aerospace

Automotive

Die & Mould

General Machining

Oil & Gas

Medical

The basic design: ETP HYDRO-GRIP - Hydraulic high precision toolholder

Pressure system:

Pressure screw and piston with sealing system.

- Optimised for thousands of pressure settings.
- Low tightening torque (6 or 10 Nm)
- Easy handling

Toolholder shank:

ETP HYDRO-GRIP is available in a large assortment of different machine interface shanks:

PSK – C3, C4, C5, C6, C8

HSK – 32, 40, 50, 63, 100

ISO – 40, 50

BT – 30, 40, 50

CAT – 40, 50

Length adjustment:

For the possibility to add screw for easy length adjustment ETP HYDRO-GRIP toolholders are equipped with a center thread.

(Not valid for PENCIL design).

The groove:

The integral spiral groove ensures any residual coolant on the tool to be removed from the contact surface when mounting the tool.

- Ensures high gripping force at any time

Pressure chamber:

- Secure clamping of any tool type.

A robust membrane and minimum amount of pressure media ensures a good temperature working range.

BENEFITS & FEATURES

- For drilling to semi-roughing
- High clamping force
- Easy handling
- Short overhang
- Modular design possibility

Assortment

The ETP HYDRO-GRIP high precision toolholders offers you the most complete advantages of any hydraulic holder available on the market today. No other fastening technology than hydraulic clamping offers you the highest precision, in terms of tool life and higher surface quality, in combination with a total concept of easy handling and flexibility in design.

ETP combines easy handling and low maintenance with an extensive range!

Product overview

Area of application

HYDRO-GRIP high precision toolholders are your guarantee of secure clamping for milling, drilling and reaming tools. Their unique strength provides precision and rigid-tool stability to improve machining performance for the largest number of applications. With the extensive range

of HYDRO-GRIP high precision toolholders all application areas, from finishing to heavy roughing, is covered. Our wide selection of toolholders ensures that you find the right solution for almost any machining application. Regardless if it's a high volume milling cutting operation, HYDRO-GRIP HD,

or when machining difficult deep contours within the mold making industry, HYDRO-GRIP PENCIL. And don't forget, all HYDRO-GRIP toolholders can be used with reduction sleeves, for maximum flexibility!

ETP HYDRO-GRIP®

ETP HYDRO-GRIP® has a very compact and robust design. Tools changes are made quickly, easily and with a high level of precision. The high clamping force guarantees a secure clamping of your milling, drilling and reaming tools. With a minimum tool runout a good

surface finish is achieved along with an extended tool life. In addition to our extensive standard range, ETP HYDRO-GRIP® can be made to your specific gauge line requirement, using our modular design possibility.

Hydraulic high precision toolholders

BENEFITS & FEATURES

- For drilling to semi-roughing
- High clamping force
- Easy handling
- Short overhang
- Modular design possibility

ETP HYDRO-GRIP® HD

ETP HYDRO-GRIP® HD, Heavy Duty, is the first hydraulic Power chuck available on the market. Here ETP combine all the positive benefits of hydraulic clamping, such as easy handling and precision, with an extreme high tool clamping force

capability and rigid design. A high bending stiffness and the dampening properties of the hydraulic pressure media makes ETP HYDRO-GRIP® HD the ideal holder for any machining, from heavy rough milling to finishing.

Heavy Duty version.
Up to 1670 Nm holding torque!

BENEFITS & FEATURES

- For rough milling to finishing
- Extreme high clamping force
- Easy handling
- Rigid design

Design your own
hydraulic precision
toolholder - Online
customized.etp.se

BENEFITS & FEATURES

- Maximum flexibility in your design
- Choose your required gauge line length
- Radial length adjustment module possible

ETP HYDRO-GRIP® CUSTOMIZED DESIGN

ETP HYDRO-GRIP toolholders can be made to your specific gauge line length requirement, using our modular design possibility.

Combine any machine shank available in our assortment, with any tool dimension (12 – 32 mm). With an

intermediate sleeve, ETP offers you your customized toolholder to any required gauge length (up to 250 mm).

These customized toolholders offer the same rigid solid design, dampening properties and high runout precision as our standard assortment.

Hydraulic high
precision toolholders

BENEFITS & FEATURES

- Quick and easy tool change
- High performance
- Slender design
- Excellent runout

ETP HYDRO-GRIP® SLENDER

HYDRO-GRIP type SLENDER is extremely user friendly which means quick and easy tool changes. It has a tough and slender design.

Hydraulic high precision toolholders – Pencil version

ETP HYDRO-GRIP® PENCIL

ETP HYDRO-GRIP® PENCIL is with its extreme slim design one of the most versatile holder on the market. An extensive range of standard dimensions and lengths optimizes your productivity when

machining deep cavities and complex components. ETP HYDRO-GRIP® PENCIL can also be made to your specific gauge line requirement, using our Customized Designs possibility.

BENEFITS & FEATURES

- For drilling to finishing
- Pencil design enabling machining in deep cavities and complex components
- Special designs possibility
- High clamping force

ETP HYDRO-GRIP® Grinding holder

We are happy to introduce our newest addition to the range of high quality hydraulic toolholders – HYDRO-GRIP Grinding holder.

With the combination of extreme high precision and easy handling and tool change a massive improvement in

productivity can be reached. Quicker set-up times and improved repeat accuracy during sharpening of tools will save you time and money. The possibility to use reduction sleeves in the hydraulic holder also increases your flexibility.

BENEFITS & FEATURES

- High run-out accuracy $\leq 0,004 \text{ mm}$ ($\leq 0.00016 \text{ inch}$)
- Easy handling and tool change
- High clamping force
- Vibration dampening
- Flexibility in clamping range – use of reducing sleeves possible

Make your ER holder hydraulic and enjoy multiple benefits

ETP ECOGRIP™ ER

With the ETP ECOGRIP ER hydraulic sleeves you can easily turn your standard ER collet holder into a high precision hydraulic holder. Thus you can easily enjoy all the positive benefits of hydraulic clamping such as easy handling and precision, at an

impressive competitive price level. This enables more users to benefit from decrease tool wear and increase productivity compared to using ER collet holders. With the use of the three axial screws an adjustability of the run-out is achieved.

BENEFITS & FEATURES

- Turning ER holders hydraulic
- Easy handling and precision
- Adjustability of run-out

*) T = Min. and Max. transmittable torque using a h6 cylindrical tool, full depth insert. For additional information see section Technical Information.

- From stock
○ On request

Information:

- Runout accuracy ≤ 0.004 mm at $2.5 \times D1$ (max. 50 mm),
 ≤ 0.00016 inch at $2.5 \times D1$ (max. 1.969 inch)
- Tool shank h6 or h7 can be used
- Center thread, Part no. S057-M8x1.25 for axial length adjustment screw (screw not included)

Accessories:

Use preset Torque Wrench, 6 Nm, to ensure correct mounting of tools. Part no. 19050.

ETP HYDRO-GRIP SLENDER can be used with reducing sleeves.
For additional information see section Accessories.

- From stock
- On request

Information:

- Runout accuracy ≤ 0.004 mm at 2.5 x D1 (max. 50 mm)
 ≤ 0.00016 inch at 2.5 x D1 (max. 1.969 inch)
- ≤ 0.007 mm at 2.5 x D1 at length L1 > 125 mm
 ≤ 0.00028 inch at 2.5 x D1 at length L1 > 4.921 inch
- Tool shank h6 or h7 can be used
- Coolant through on all holders
- Bore for data carrier

Accessories:

Use preset Torque Wrench, 6 Nm, to ensure correct mounting of tools. Part no. 19050

ETP HYDRO-GRIP PENCIL can be used with reducing sleeves.

Information:

- Runout accuracy ≤ 0.004 mm at $2.5 \times D1$ (max. 50 mm),
 ≤ 0.00016 inch at $2.5 \times D1$ (max. 1.969 inch)
- Tool shank h6 or h7 can be used
- Center thread, for axial length adjustment screw (screw not included)
- Size 12, 1/2", 16, 5/8": M8x1.25
- Size 20, 3/4, 25, 1": M10x1.5
- Size 3/8" - no center thread

Accessories:

Use preset Torque Wrench, 6 Nm, to ensure correct mounting of tools. Part no. 19050.

ETP HYDRO-GRIP SLENDER can be used with reducing sleeves.
For additional information see section Accessories.

*) This size ECOGRIP ER has 2x M3x16 adjustment screws located 180 degrees apart.
It also has an additional 2x M5x8 adjustment screws, located 180 degrees apart, at the back of the thread nut.

● From stock
○ On request

**) The thread nut width L6 of this size ECOGRIP ER is 20 mm. The thread depth is however only 15 mm.

*) T = Min. and Max transmittable torque using a h6 cylindrical tool, full depth insert. For additional information see section Technical Information.

Information:

- Runout accuracy - adjustable!
When mounted correctly, an initial runout of approx. 0.020 mm is achieved.
Adjust runout further by lightly tightening on the adjustment screws until your desired runout is achieved.
- Tool shank h6 or h7 can be used
- Balanced by design. For use above 5 - 10 000 rpm – we recommend individual balancing.

Accessories:

Use preset Torque Wrench, 6 Nm, to ensure correct mounting of tools. Part no. 19050.
For ER16 Use Torque wrench Part no. 19055.

ETP ECOGRIP ER can be used with reducing sleeves.
For additional information see section Accessories.

Reduction Sleeves for ETP Toolholders

Reduction sleeve HS - for internal cooling

The reduction sleeves are designed to fit with the ETP Toolholders. They are specially suited for high precision clamping of cylindrical tool shanks per DIN 6335 form HA, HB and HE, as well as tool shanks per DIN 1835 form B, C, D and E.

The special design of the reduction sleeves allows an efficient use of coolant through cutting tools.

Reduction sleeve HS-CF - for peripheral cooling

Outer-Ø of reduction sleeve corresponds to the type.

HS12 = Ø 12 mm
HS20 = Ø 20 mm
HS25 = Ø 25 mm
HS32 = Ø 32 mm

BENEFITS & FEATURES

- **Standard version HS suited for internal cooling**
Metal-to-metal seal for cutting tools with internal coolant channels.
- **HS-CF version suited for peripheral cooling**
The coolant flush reduction sleeves HS-CF can be used for peripheral cooling due to their coolant channels.
- **Accurate precision**
High runout accuracy < 3 µm.
- **High flexibility**
Clamping of different tool shank diameters. 12, 20, 25, 32 mm and 1/2", 3/4", 1", 1 1/4".
- **Power increase**
When using reduction sleeves the transmittable torque is increased.

Using Reduction sleeve HS - for internal cooling.

Using Reduction sleeve HS-CF - for peripheral cooling.

Accessories

Torque wrench and Extractor

Comparison of Transmittable Torque at Ø 20 mm

Torque wrench

Use torque wrench to ensure correct tightening independent on user. Should be used with all HYDRO-FIX® holders.

Item description	Tightening torque:		Part no.
	Nm	ft · lb	
• Torque wrench (4 mm Hex)	6	4.4	19055
• Torque wrench (5 mm Hex)	6	4.4	19050
• Torque wrench (8 mm Hex)	10	7.4	19054

Extractor

Item description	Part no.	For Sizes	A [mm]	B [mm]
• EHS 12 - 1/2"	E7321.12000	HS 12	24.6	100
• EHS 20 - 3/4"	E7321.20000	HS 20	38.0	160
• EHS 25 - 1"	E7321.25000	HS 25	51.0	180
• EHS 32 - 1 1/4"	E7321.32000	HS 32	63.0	200

The extractor helps to remove the reduction sleeve from the clamping unit.

- Improper assembly can damage the concentricity of the reduction sleeve.
- Insert tools the full length of the reduction sleeve.
- Tool shank h6 or h7 can be used.
- Do not clamp reduction sleeve without a tool. Reduction Sleeve will be damaged.

Transmittable torque

The tables gives the minimum transmittable torque depending on the tool diameter and tolerance.

For optimal performance and precision we recommend the use of h6-tools. Also tools with h7 tolerance can be used, however the transmittable torque will decrease, see tables:

- at direct tool clamping

- at clamping with reducing sleeve

Torque transmission capacity at different tool tolerances for:		HYDRO-GRIP / ECOGRIP							
<i>Tool diameter in mm</i>		6	8	10	12	16	20	25	32
Tol. h6 min.	Nm	12	27	35	60	165	260	480	820

Transmittable torque

- at reduced clamping length

"By reducing the tool clamping length, an increase accessibility can be reached when machining. Below table indicates the reduction in torque capacity in such a case. For short time use only!"

HYDRO-GRIP torque transmission capacity at different clamping lengths

Clamping length X diameter D1						
	1,0	1,5	2	2,5	3,0	Min. length*
Holder mm	Nm	Nm	Nm	Nm	Nm	mm
12	5	15	25	40	60	35
20	45	100	175	260	260	46.5
25	110	235	440	480	480	50.5
32	260	585	820	820	820	53.5

Clamping length X diameter D1						
	1,0	1,5	2	2,5	3,0	Min. length*
Holder inches	ft-lb	ft-lb	ft-lb	ft-lb	ft-lb	inch
1/2"	3.7	11	18	30	44	1.378
3/4"	33	74	129	192	192	1.831
1"	81	173	325	354	354	1.988
1 1/4"	192	431	605	605	605	2.106

Balancing:

All holders are dynamically balanced.
See corresponding product pages for details.

Runout:

All ETP holders are delivered with a high runout accuracy at time of delivery. The runout value is measured at $2.5 \times D1$.

See corresponding product pages for details.

Recommended tightening torque:

- **HYDRO-GRIP** 6 Nm
- **HYDRO-GRIP HD** 10 Nm
- **ECOGRIP** 10 Nm

Always use a torque wrench for best chuck performance and repeatability.

- **Torque too high**
may cause screw damage.
- **Torque too low**
may cause tool vibration, tool movement, affects surface and tool accuracy, balancing.

Handling:

ETP HYDRO-GRIP and ETP ECOGRIP are high precision toolholders and should be handled with care for optimal performance.

- **Before inserting tool, check for damages on tool and holder.**
- **Tools should be of correct dimension and tolerance (h6 or h7), and cleaned.**
- **Do not use force to insert tool, it should easily slide in position.**
- **Mount the tool by tightening the pressure screw to the recommended tightening torque, marked on the holder. Use a fixed torque wrench.**
- **When stored lubricate the holder with a thin oil for corrosion resistance.**
- **Do not use HYDRO-GRIP/ECOGRIP at working temperatures above 85 degrees C / 185 degrees F. Do not use HYDRO-GRIP HD at working temperatures above 70 degrees C / 158 degrees F. (This may increase the pressure in the holder and influence it negatively).**
